

SAFEGUARDS

THE SOLUTION FOR ALL YOUR POINT OF SALE DEBIT PAYMENT DEVICES

Canada's Largest Grocery Store chain has installed SAFEGUARDS on all their POS debit/credit card terminals across the country

SAFEGUARDS ENSURES:

- Ease of use for employees and customers
- Enhanced comfort and safety for employees and customers
- Frequent opportunities for thorough cleaning with products containing bleach
- Prevention of keypad damage
- Savings by avoiding potentially costly repairs

PRODUCT BENEFITS:

- Safeguards does not create any interference to RFID transmission during payment.
- Safeguards completely clear material means no visibility restrictions to keyboard characters or screen information.
- Safeguards proprietary clear material is completely flexible. This allows frequent, easy removal and re-installation for cleaning and/or maintenance.
- Safeguards is designed to have cleaning products or sprays, including bleach, applied directly to its surface. Cleaners and disinfectants will not harm it.
- Safeguards provides a barrier preventing liquids leaking between keypad buttons, stopping damage to sensitive electronics.
- Safeguards demonstrates extreme durability. Originally developed after the SARS pandemic, examples installed in schools in 2014 continue to function effectively.

ADDITIONAL PRODUCT APPLICATIONS:

- Safeguards can be used for clear, protective shields on self checkout keypads.
- Safeguards can provide a clear, protective barrier for cashier till pads.
